

Bombay Chartered Accountants' Society

Lecture Meeting on “Future Perfect”

Dear Members,

Chartered Accountants are considered to be financial advisors to their employers/clients. They do provide solutions on right mix of investments and planning for the future. However, when it comes to planning of their future, it has been observed that either they take it too lightly or they have the notion of invincibility.

A massive storm is coming and we are out in the open with just the protection of a tent!!

By 2050, India will have 340 million elderly population without enough retirement savings and social support. We professionals might be amongst those as well. The government alone can't do anything to ensure that you have the right amount of savings for your retirement.

BCAS has the interest of professionals as well as their clients at the fore. It wants to ensure that all those who are associated with BCAS are empowered with awareness of how best to have a blissful retired life.

It is often said that God also helps those who help themselves and that's why BCAS has organised a Lecture Meeting on “Future Perfect”, wherein the speaker will provide insights to the solutions that would ensure that we have enough to retire right and stay independent and free in our golden years as well.

This is an attempt to serve the community in areas other than their professional interest but which is of much relevance from their personal perspective.

The details of lecture meeting are as under:
